No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
                                                                                                            Score

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  This sequence represents a polynucleotide of the invention. It was isolated from Helicobacter pylori and encodes a H.pylori GHPO protein. The polypeptides can be used for preventing or treating Helicobacter infections, and gastroduodenal diseases associated with these infections, including acute, chronic, and atrophic gastritis, and peptic ulcer diseases, e.g. gastric and duodenal ulcers. They can also be used for the production of antibodies. The products can also be used for detection and diagnosis
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            New isolated Helicobacter polynucleotides - the diagnosis, prevention and treatment of gastrointestinal diseases.

This DNA sequence codes for a 32 kDa Helicobacter pylori polypeptide (see AAW73034) designated GHPO 1360. A polymucleotide encoding the unprocessed, or the mature, GHPO 1360 can be obtained from genomic DNA by PCR amplification (see AAW07969-70 and AAW07973). The invention provides polymucleotides (see AAV72001, AAV07912-21 and AAV07963-64) encoding a
